Mission: To support and empower women and families impacted by substance-use disorder.
Vision: We envision a community where women who experience substance-use are supported and empowered to have healthy pregnancies and healthy families.

"PCAP saved my life!"

"Before PCAP I never thought about goals. They showed me the right direction. They showed me that I am responsible. That no matter who I am or what I do, I am somebody. It is never too late."

"This program is essential in helping mothers help themselves."
